

 **INTER
LOCK**
Lifetime Roofing Systems®

Never Re-Roof Again.®

President's Message

Interlock® Roofing has a long and proud tradition of offering homeowners trend-setting, elegant, and environmentally sustainable roofing solutions. Our roofing products are designed and tested to be attractive, durable, and last a lifetime. When you choose Interlock, it will very likely be the last roof you ever need.

The Interlock Roof meets the most rigorous tests of environmental responsibility. Our lifetime roofing products contain recycled aluminum (which is just as strong as first-gen aluminum) and is very environmentally-friendly and sustainable. Interlock is an energy-efficient product. Owning an Interlock roof helps end the cycle of landfill waste caused by the disposal of failed roofing. And, we are pleased to bring forward a practical platform to support your solar roofing requirements allowing you to harvest clean, renewable solar energy that can be sent directly into the power grid. For you, choosing Interlock means less dependence on our natural resources, less pollution in your area, and less money out of your pocket over time.

Our products are designed to provide you with the confidence that your decision to invest in our roof is sound, environmentally responsible, and improves the look of your home. Stringent industry tests are conducted on our slate, shingle, shake, tile and standing seam profiles to confirm maximum protection from extreme climate conditions. Interlock Roofing is exclusively coated with the Alunar® Coating System to ensure ultimate durability, strength, and appearance. An elegant final appearance is achieved with a low gloss matte finish technology. With Interlock Roofing, you will find an appealing color and style to suit you and your home. Whether you choose to install your roof with an independent Interlock dealer or an affiliated contractor, you have the confidence of knowing your roofing product is sustainable, manufactured to exceed industry standards, elegantly designed, pays for itself over time, and will last as long as you live in your home.

We stand by what we sell with an industry leading lifetime limited, one-time transferable warranty (good for 50 years for the next owner). On behalf of the Interlock Team, I am very proud to offer you not only the last roof you should ever need, but also one that is environmentally friendly and sustainable.

Sincerely,
Mark Wenzel
President

Why Choose an Interlock[®] Lifetime Roof?

Our roofing systems will provide you with a lifetime of value.

Deep Charcoal Interlock® Slate

Deep Charcoal Interlock® Shake

Deep Charcoal Interlock® Slate

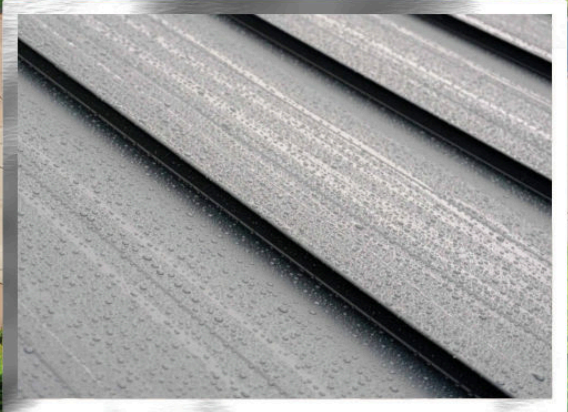

Black Interlock® Slate

Deep Charcoal Interlock® Slate

Black Interlock® Slate

Deep Charcoal

Interlock[®] Standing Seam

The classic look of metal roofing.

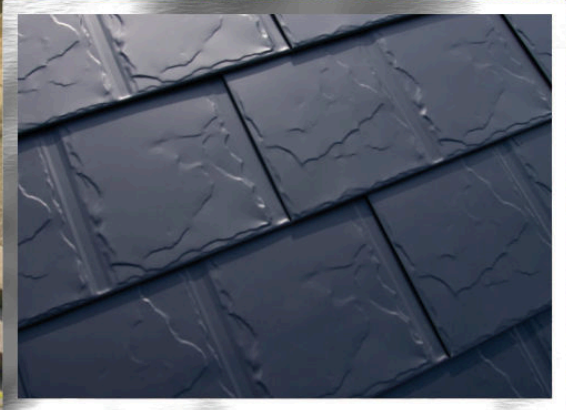

A popular choice for homes because of its clean look. Long, dramatic shadow lines will make your home stand out. Interlock Standing Seam is weathertight thanks to its interlocking panels that are mechanically locked.

Our protective coating, that goes on both sides of the panels, gives further protection from the elements, especially the salt air of the ocean.

Curved and tapered is also available for custom architectural roof details.

- Aluminum will not corrode like steel
- A wide range of colors available
- Solar compatible
- Lifetime Limited Warranty

Black

Interlock[®] Slate

The elegance of slate roofing without the weight.

Real slate is expensive and very heavy. A home may need to be reinforced for the extra weight it brings. An Interlock[®] Slate roof will give you the look, protection and longevity of real slate without that extra weight.

- Removes the need to reinforce your home for weight
- Naturally resistant to fire
- No more cracking or splitting
- Four-way interlocking connection system on all sides of the shingle
- Hail Impact Testing (UL2218 Class 4 - Highest rating available)
- Lifetime Limited Warranty

Deep Charcoal

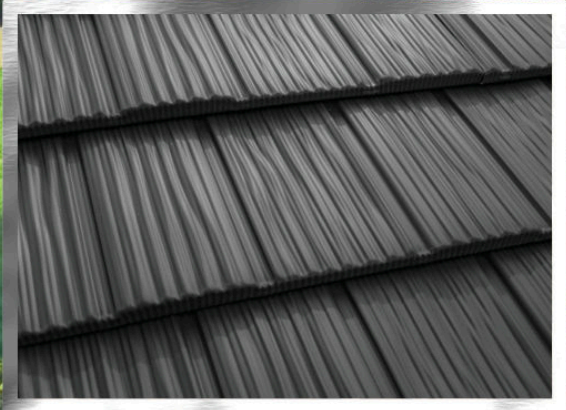

Interlock[®] Cedar Shingle

Crafted to resemble thin-cut wood shingles. Built to last for a lifetime.

The beautiful look of cedar in aluminum comes from embossing them with a heavy grain texture. Each shingle is then interlocked four-ways, and nailed to the roof surface to protect your home. Additional protection comes from our exclusive Alunar[®] Coating System to provide an extremely durable and attractive surface. Available in many designer colors.

- No more shingle deterioration (Curling, cracking, rotting, or splitting)
- Superior weather protection
- Can be installed over existing roofing
- High velocity wind tested (Additional fasteners may be required to comply with local building codes.)
- Hail Impact Testing (UL2218 Class 4 - Highest rating available)
- Lifetime Limited Warranty

Deep Charcoal

Interlock[®] Shake

The beauty of real shake. Lifetime performance.

Unlike traditional cedar shakes, our aluminum version will never split, warp, crack, or rot. Our Interlock[®] Shake panel is a two-way interlocking system. Each panel is embossed with a natural looking, heavy grain texture, and also coated with our exclusive Alunar[®] Coating System. Matching color trims are available. A lifetime solution if you love the look of cedar shake roofing.

- Avoid yearly maintenance that hand-split shake requires
- Naturally fire resistant
- Environmentally sustainable / recyclable
- High velocity wind tested
Additional fasteners may be required to comply with local building codes.
- Hail Impact Testing (UL2218 Class 4 - Highest rating available)
- Lifetime Limited Warranty

Tile Red

Interlock[®] Tile

Inspired by the luxurious look of traditional Mediterranean tile, without the weight.

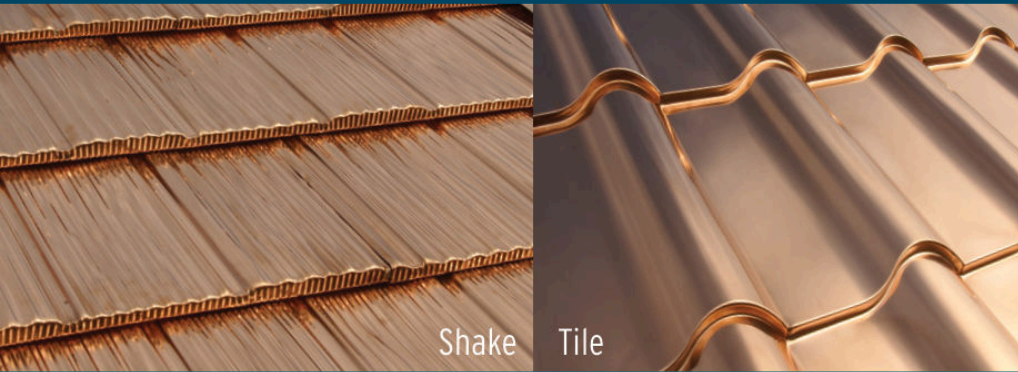

Interlock[®] Tile is designed to be the last roof you ever install on your home or development. Real tile roofing is charming, but also very heavy. While real tile is durable, they can crack or break. Often the support system underneath will fail well before the tile does. Our tile is very lightweight. It's 90% lighter than concrete or clay, so you won't have to reinforce your home's support system. Important if you live in an earthquake zone.

- Will not crack
- Lightweight
(No need to reinforce your home's structure)
- Extremely weather resistant
- Hidden fastener system
(No unnecessary exposed screws on panels)
- Hail Impact Testing (UL2218 Class 4 - Highest rating available)
- Lifetime Limited Warranty

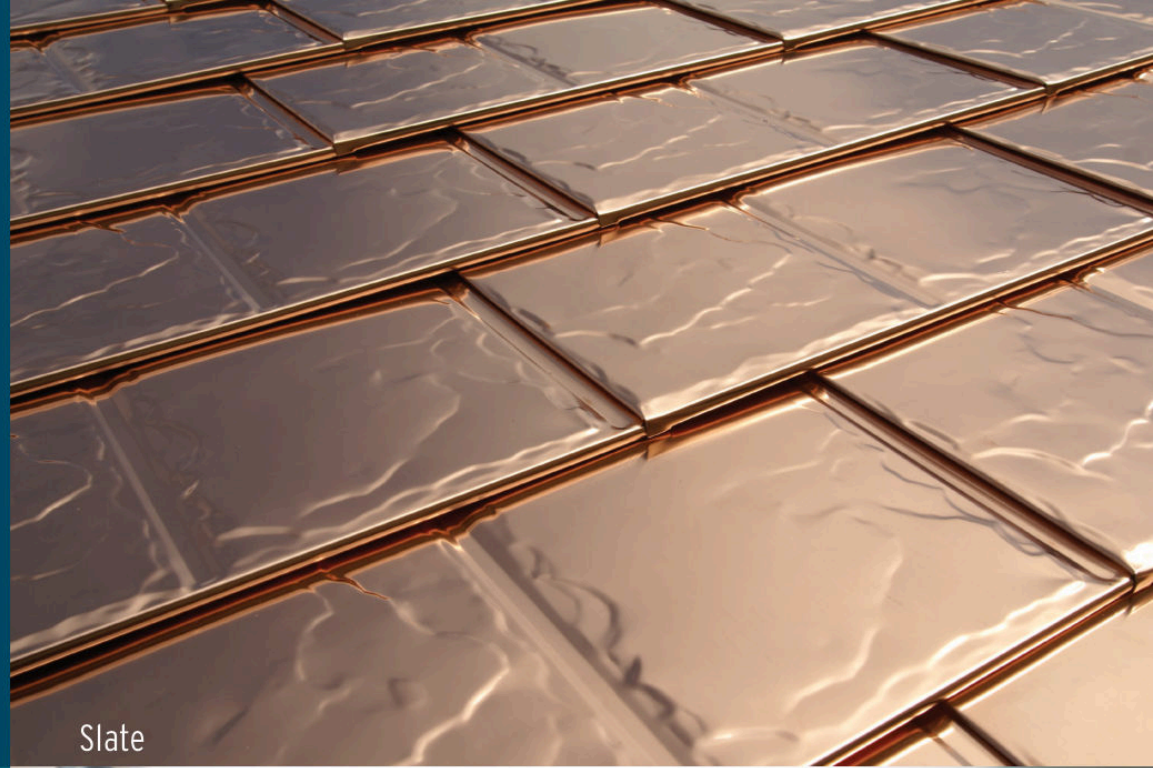

Interlock[®] Solid Copper

A premium option for your roof. Will patina over time for a beautiful and timeless look.

Neighborhood Referral Program

Metal roofing has never looked so good.

Custom & Specialty Work

Curved And Tapered

"We did quite a bit of research. It came out that Interlock was the best value for the money and the best looking roof we found.

The neighbors say "WOW! We love your roof". And the warranty - it doesn't come much better than that. You can't beat it.

The installers took real pride in what they did. We were impressed. And they cleaned up after they left every day. We recommend Interlock all the time to anyone who asks."

"Our shingles were 15 years old and failing. We looked around for a new roof and did our research and saw that Interlock was the best. That's why we chose it.

The neighbors saw the new roof going on and were extremely complimentary about the job being done. The installers were excellent. The crew worked diligently, cleaned up every day and I compliment them immensely.

I'm impressed with the length of the warranty of the fact that it can be transferred to new owners if we decide to sell. "

“Everybody in our neighborhood likes the roof. People have said they can’t believe it’s aluminum.

I have no fear of any kind of weather now.

Interlock is absolutely professional and I highly recommend them from sales all the way down to installation.

The installers were the hardest working group I have ever seen. They did everything we expected and more.

The warranty is fantastic.”

“The product simply looked better than any other metal roofs out there. And you tend to get what you pay for.

After 15 years we were starting to see a lot of rot on our roof. I did not want to re-roof again. Rather than take a risk, we chose Interlock.

Our plan is to retire here and stay in this house. But sometimes plans change. The transferable warranty is really important to us just in case we move.

The installers were awesome. Extremely cautious, diligent, friendly and left zero mess, a good experience. ”
